# 04 Mission

Our 'why' is the motivation to help slow the rate of climate change through enabling a faster and simpler transition to EV. With each EV saving on average 42.7 tonnes of CO<sub>2</sub>e over its lifetime compared to ICE, solving the charging question is crucial to combating the climate crisis and has become our mission. Since 2021 we have succeeded in enabling tens of thousands of individual EV revolutions through relentless focus in a number of key areas.

As the adage goes, if you want something done properly do it yourself. All hardware, software is **engineered in-house** with every Hypervolt unit manufactured at our factory in Essex, with all administrative and operational functions being based out of the same site, or at our Canary Wharf HQ.

# Say Hello To **Home 3 Pro**

05

Hypervolt has developed a flawless, smart and beautifully designed charger that meets all domestic charging needs.

Manufactured in the United Kingdom, this home charger has successfully powered the EV revolutions of tens of thousands of individuals, now it could be time for Hypervolt to power yours.

06

# Luxury Without The Premium

Three **tethered cable** length options with a soft-touch handle for an easy and convenient experience.

All Hypervolt chargers are sustainably engineered and manufactured in-house, here in the **United Kingdom**.

Hypervolt has developed a **smart**, and **beautifully-designed** charger that meets all your domestic charging needs.

# Meet The Hypervolt App

## Solar Charging

Power your car directly from the sun, the cleanest way to charge, and accelerate your journey to energy independence.

## Multi-Mode Scheduling

Set custom schedules to fit your routine, driving habits, and the weather. Choose from Boost, Eco, Super Eco modes, automatically switching between solar power and affordable energy tariffs.

## Consumption Reporting

Easily track your spending and consumption through our reporting tool. Claim back expenses with exportable PDFs.

## Driven by Energy Tariffs

Maximise energy savings with custom tariffs, including integration with OVO Charge Anytime.

# Manufacturing

09

## **Always Superlative**

Hypervolt came about due to the looming climate emergency and thus it falls on us, not only to transition as many drivers as we can to EV, but to be environmentally responsible ourselves as we carry out this mission. Strictly manufacturing in the UK allows us to ensure this and maintain tight control of our supply chain.

Far from the industry norm of sampling a small number each batch of chargers, Hypervolt puts each unit through 3 quality control stages at our Rainham factory, alongside photographing and logging each unit before dispatch. This is the only way we can ensure absolute consistency and accountability.

# Hypervolt Support

Britain's Highest Rated EV Charger

## Hypervolt

Excellent

✓ VERIFIED COMPANY

### Amazing customer service!

From pre-sales to receiving our charger, Callum and the Hypervolt sales team were so helpful. I couldn't believe I had an email response late from them on a Saturday eve! Callum went above and beyond to make sure I had the charger available so quickly and in time for our electrician to install. The product looks great, the app easy to use. I would definitely recommend Hypervolt +++++

- Darren

### Excellent!

Enquiry quickly dealt with and I was referred to Missenden Electrical to install. The whole experience was very positive. They came round to do a site visit to survey as it wasn't a standard installation and discussed the different alternatives. On the installation day, they arrived when expected and were friendly, helpful, tidy and explained how it all worked at the end. Would highly recommend Hypervolt and certainly use them again.

- Karrie

### The Best!

I have had Hypervolt for nearly two years. In that time, it has never not charged my car or let me down. It is very reliable even in heavy Scottish snow. The Hypervolt staff are the best you will get, friendly, professional and knowledgeable. Not only that but even weekends or out hours there is always someone to help. I am proud to have a Hypervolt.

- Neil

### Excellent Hypervolt charger and install!

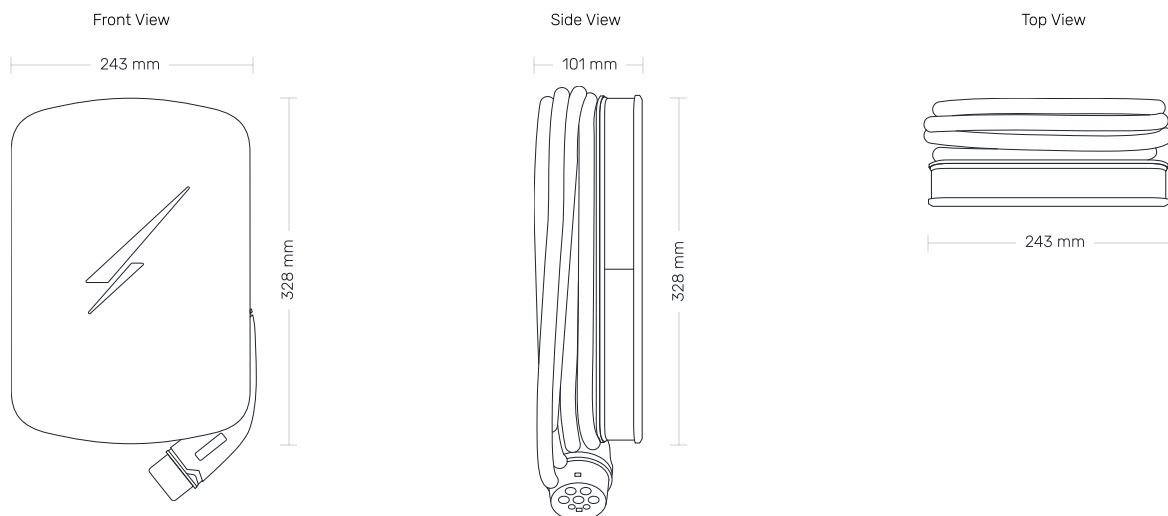

Hypervolt fitted by approved installer. Really pleased with the charger, integrates perfectly with solar and battery installation. Installation was smooth and all my queries answered. App is intuitive and I found it easy to use. Pre-sales query answered knowledgeably and promptly. Have no hesitation in recommending this charger.

- Dave
